

Diver LED Light

Introduction

The Seccurro Diver LED Light is a high quality light system in a water-tight housing which can be used as a divers helmet light, camera-light or as a general underwater light.

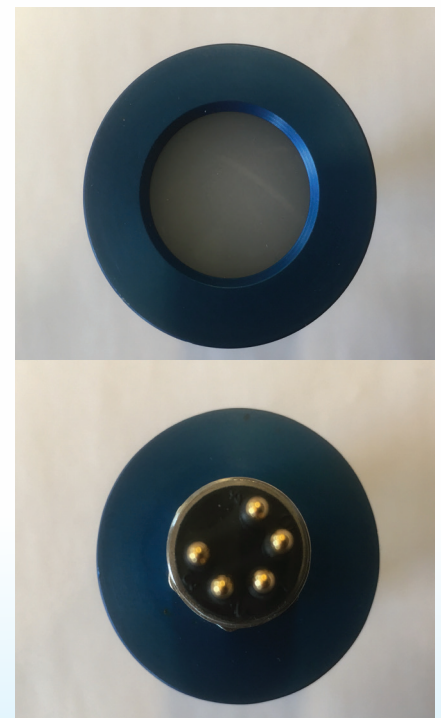

The Diver LED light is dimmable in two ways:

- with 2 external switches (not part of delivery)
- with analog signal (0-10 VDC)

Specifications

- Partnumber SE-op07-SES
- Housing Anodised aluminum
- LED power 10 W
- Power requirements 24 VDC, 0.8 A
- Power consumption 800 mA
- Colour temperature 6,000 ± 500 °K
- Light intensity 1,000-1,200 Lumen
- Beam angle > 70 °
- Dimmable (with switches) 10 steps
- Dimmable (analog) 0 - 100%
- Operating temperature -10 to +50 °C
- Operating life 50,000 Hours
- Depth rate 150 msw
- Length 100 mm
- Diameter 40 mm
- Weight 310 gram
- Compliance RoHS

The benefit of the Seccurro Diver LED Light, in addition to other Diver LED lights, is the automatic dimming function. A protection circuit prevents overheating by reducing the power to the Diver LED light.
